---

Daron,

Plateau Mining Corporation (PMC) has been asked by its land department to request another extension to the Crandall Canyon deficiencies due to their inability to get the Partial Release of Mortgage from Blackhawk. This is the only issue holding up our submittal. PMC is wondering if it should go ahead and submit its response to the deficiencies on August 17, as though Mr. Martineau is the land owner, to give the Division the opportunity to review and determine the adequacy of their response.

The submittal will be written whereby the only remaining issue, proof of ownership by Mr. Martineau, can be easily inserted into the Appendix 3.7V.

PMC is eager to get this amendment off its plate, as I am sure the Division is too. Please advise PMC on which direction the Division recommends. If an extension is preferred, I guess PMC would ask for another month and hope Blackhawk can accomodate our timeline.

Thanks,

Johnny
